It is the information, that 98 per cent of all cases of consumption can be completely and per man ently cured. There is no doubt about it. The statement is not made recklessly, but after the experience of thousands has made it an indisputable fact. Consumption is not a disease of the lungs. It is a disease of the blood, which in weak lunged people manifests itself by the formation of tubercles in the lungs and the wasting away of lung tissue. The cure for consumption is simple. It consists in the administration of a medicine that will assist the lungs in throwing off tuberculous matter, and that will cleanse the system so that this refuse matter will be replaced by strong, healthy tissues. That sounds like a very simple operation, and yet consumption baffled the combined medical skill of the whole world for hundreds of years. Consumption was considered incurable until the advent of Dr. Pierce's Golden Medical Discovery. This great remedy is the most wonderful blood purifier and strengthener that the world has ever known. It is the result of years of sludy and experiment, by a scientific physician and has been tested in every way by him for over 30 years. It cures a great variety of diseases, because almost all diseases have their origin and support in impurity and weakness of the blood. As long as a man's blood is rich and pure, he is in no danger from diseases. The blood is the medium through which food is carried from the digrestive system to all of the tissues of the body. If it carries impure things, or an insufficient quantity of good things, trouble will ensue. There is nothing about that so very hard to understand. It is perfectly plain and natural and rational. The "Golden Medical Discovery" puts the digestive system in perfect order, purifies and enriches the blood and so puts the whole body into perfect tune.
